SECTION 4: FIRST AID MEASURES

4.1. Description of first aid measures

General recommendations

Stop the exposure and remove the injured person from a polluted environment. Place in a lateral position. Provide fresh air and heat. In the event of health problems, immediately contact doctor. Show SDS of product. Inform medical personnel of provided first aid.

Contamination of the skin:

Remove contaminated clothing. Contaminated areas of the skin wash thoroughly water with soap. In the case of persistent irritation or sensitization consult a doctor. Contaminated clothing wash before reuse.

Contamination of the eyes:

Flush contaminated eyes with wide-open eyelids a continuous stream of water for about 10 minutes. In the case of persistent irritation consult an ophthalmologist.

Inhalation:

Remove victim from exposure, place victim in a reclining position. If breathing is difficult provide fresh air and immediately call for medical help.

Ingestion:

Rinse mouth immediately and then drink plenty of water (do not drink, milk, oil or alcohol), seek immediate medical attention. WARNING: Fats, edible oils, alcohol increase active ingredients assimilation.

The combustion / thermal decomposition of the product may produce carbon, nitrogen, chlorine oxides, hydrogen chloride, other harmful gases. Avoid inhalation of combustion products, may pose a threat to health.

5.3. Advice for fire-fighters

Strictly apply the breathing apparatus and protective clothing for firefighting or during clean-up work immediately after a fire in an enclosed, or poorly ventilated areas.

General advice: Remove from the endangered area unauthorized persons, not involved in extinguishing the fire, order evacuation if necessary.

Additional notes: Packaging exposed to fire should be cooled with water jet (at temperatures above 50°C, an explosion can occur). Packaging which are not covered by the fire, exposed to high temperature should be if possible removed from the hazardous area. Fire residues and contaminated waters dispose in according to applicable regulations. Do not introduce contaminated waters into drains.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid direct contact with releasing product. Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. Remove all potential ignition sources.

Inform about the accident, call the appropriate emergency services (e.g. Fire Brigade, Police) if necessary.

6.2. Environmental precautions

Do not allow to enter drains, groundwater, soil and open water courses. Spilled liquefied product should be protected against spreading using dams or barriers. In case of water contamination inform local authorities.

6.3. Methods and material for containment and cleaning up

In case of unsealed container or spillage secure source of contamination and move product to empty container. Spillages should be treated by appropriate sorbent (sand, sawdust, diatomaceous earth, vermiculite), collected to closed container, labelled and take to a special waste disposal site in accordance with local authority regulations. Area of spillage should be thoroughly cleaned with water and detergents, observing environmental regulations.
